Purposes: This course is an introduction to a number of issues in bioethics through the lens of human rights. After first introducing basic concepts in human rights, ethics, and religion that are important to bioethics, we will look at some contemporary issues in bioethics including: human embryonic stem cell research, reproductive technologies, human enhancement, and race and genetics. Through writing about these issues, the student will develop a sense of the moral issues at stake in these technologies as well as their implications for human dignity, worth, and personhood, understood in a cross-cultural sense.

Course Requirements

All of the following are required to get credit for the course – you *cannot* pass this course without completing all requirements below. You *cannot* pass the course without passing the paper writing component of the course. Keep in mind that this is a writing course and consequently, you will be asked to write a lot during the course of the semester. Due dates for work appear in the schedule below. Overall course grade is weighted as follows: Dates are tentative.

1. One 3 page editorial (750 words each) = 10% total
 - Tues. Feb. 3. Draft Due. 5%.
 - Tues. Feb. 17. Final Draft Due. 5%
2. One 5 page paper (1250- 1400 words) = 20%
 - Thurs. Feb. 26. 10% first graded draft
 - Tues. March 24. 10% final draft and 1-2 page reflective analysis of your writing, revisions, and educational value of the assignment
