The American Association for the Advancement of Science, "Triple A-S" (AAAS), is an international non-profit organization dedicated to advancing science around the world by serving as an educator, leader, spokesperson and professional association. In addition to organizing membership activities, AAAS publishes the journal Science, as well as many scientific newsletters, books and reports, and spearheads programs that raise the bar of understanding for science worldwide.

HURIDOCS (Human Rights Information and Documentation Systems, International), established in 1982, is a global network of human rights organisations concerned with human rights information. HURIDOCS champions effective documentation and information handling, including the use of information and communication technologies, as a force to defend, assert and promote human rights.
